What is Work Security?
Harvard University and the Harvard Union of Clerical and Technical Workers share a strong commitment to retain staff members in our working community and especially to those employees who face job elimination due to layoff. Our negotiated Work Security Program outlines three important pieces. First, it provides layoff candidates who have a history of proven contributions to the Harvard workplace with preferential status for all Harvard jobs for which they are qualified. Second, it calls for salary and benefit continuation beyond the layoff date for up to three months, with the possibility of extension for up to three additional months if authorized by the Joint Work Security Committee. Third, the Program has designed a critical role of Case Managers to assist in the employee’s successful securing of a Harvard position. This brochure is intended to be used as a practical guide for Case Managers.

What does “preference” mean for a Work Security candidate?
Based on their history of proven contributions, laid off staff members will be given preference over outside candidates for any vacant job for which they are qualified. That means that these individuals should be hired over outside candidates and incumbent temps.

What constitutes enough of a job search to qualify for Work Security and/or an extension?
An active job search includes making all reasonable efforts to apply for all relevant positions within the University as well as maintaining an active job search outside of the University. The candidate also needs to stay in regular contact with his/her Case Manager.

How can a Case Manager facilitate getting an interview for a layoff candidate?
The HU/HUCTW contract provides that all HR offices will interview laid off employees who have applied for jobs in that unit. In addition, Case Managers should employ persistence to set up an interview with the direct hiring supervisor.
