

**QUALIFIED DEFAULT INVESTMENT ALTERNATIVE (QDIA) NOTICE**  
**for the**  
**Harvard University Defined Contribution Retirement Plan**  
**Harvard University Retirement Plan**  
**Harvard University Tax-Deferred Annuity Plan**  
**Retirement Income Plan for Teaching Faculty of Harvard University**

Harvard University sponsors the Harvard University Defined Contribution Retirement Plan, the Harvard University Retirement Plan, the Harvard University Tax-Deferred Annuity Plan, and the Retirement Income Plan for Teaching Faculty of Harvard University (collectively, the “Plans”). You are receiving this QDIA Notice because you participate, or may soon become eligible to participate, in one or more of these Plans.

As a participant, you have the right to direct the investment of your Plan(s) accounts among a menu of investment options, in compliance with procedures established by the Plan Administrator. If you fail to direct the investment of your Plan(s) accounts, the undirected accounts will be automatically invested, by default, in the applicable “Qualified Default Investment Alternative”, or “QDIA”. We are required by law to inform you how your Plan(s) accounts will be automatically invested in the QDIA and how they will continue to be so invested if you do not provide investment instructions. **You do not need to take any action in response to this QDIA Notice if you have already selected the investment options in which your Plan(s) accounts will be invested.**

This QDIA Notice gives you important information about the Plans’ QDIA investment rules, including:

- How your Plan(s) accounts will be automatically invested, by default, in the applicable QDIA if you fail to direct the investment of all of your Plan(s) accounts;
- How you can direct the investment of your Plan(s) accounts away from the QDIA and to any other investment options available under the Plan(s).

**1. How will my Plan(s) accounts be invested if I fail to choose an investment option?**

If you fail to choose any investment options, then all of your Plan(s) accounts will be automatically invested, by default, in one QDIA, specifically, the Vanguard Target Retirement Fund with a target date closest to the year in which you will reach age 65.

Keep in mind that all investing is subject to risk, and investing in any Vanguard Target Retirement Fund is subject to the risks of any such Fund’s underlying investments. Each Vanguard Target Retirement Fund is named, or otherwise described, with reference to a particular year (sometimes called the “target year”) that is closest to the year in which an investor in that Fund would reach age 65. Any Vanguard Target Retirement Fund will gradually change its asset allocation over time, shifting to more conservative asset allocations based on its target date. Any investment in a Vanguard Target Retirement Fund is not guaranteed at any time, including on or after the Fund’s target date.

The enclosed fact sheet for the Vanguard Target Retirement Funds provides additional information, including investment objectives, risk and return characteristics, and fees and expenses. You can obtain updated information on fees and expenses and a more detailed explanation of the Vanguard Target Retirement Funds by calling the Harvard University Retirement Center (HURC) at (800) 527-1398 or visiting [harvie.harvard.edu/investment-options](http://harvie.harvard.edu/investment-options).

**2. How can I direct the investment allocation of my Plan(s) accounts away from a QDIA and to any other investment options available under the Plan(s)?**

The Plan(s) allow you to choose from a diverse menu of investment options. A list of available funds and a copy of the prospectus or information statement for each fund may be obtained by calling the Harvard University Retirement Center (HURC) at (800) 527-1398, or by clicking on the HURC link under “Employee Tools” at [harvie.harvard.edu](http://harvie.harvard.edu), or by visiting [tiaa.org/harvard](http://tiaa.org/harvard).

You have the right to change the investment allocation of your Plan(s) accounts at any time. You can change how your Plan(s) accounts are invested by clicking on the HURC link under “Employee Tools” at [harvie.harvard.edu](http://harvie.harvard.edu), visiting [www.tiaa.org/harvard](http://www.tiaa.org/harvard) or by calling the HURC at (800) 527-1398. Please note: If you elect to change the investment allocation of your Plan(s) accounts from one of the Vanguard Target Retirement Funds, there are no fees or expenses imposed in connection with that transfer. However, certain restrictions may apply if multiple transfers are made from any one account during any 60-day period. See the prospectus for more details on restrictions on frequent transfers.

**3. Whom should I contact if I have any other questions?**

You can find out more about the Plan(s) in which you may be eligible to participate in Harvard’s [Summary Plan Description](#) (SPD), which is available by calling the HURC at (800) 527-1398, or by visiting [harvie.harvard.edu](http://harvie.harvard.edu). Information about the investment options is available by calling the HURC at (800) 527-1398, or by visiting [harvie.harvard.edu/investment-options](http://harvie.harvard.edu/investment-options). There, you can obtain updated information on fees and expenses and a more detailed explanation of the Plans’ investment options. Detailed information on Plan fees may be also found by calling the HURC, or by going to [https://www.tiaa.org/public/pdf/obiee/100313\\_Plan\\_Investment\\_Notice.pdf](https://www.tiaa.org/public/pdf/obiee/100313_Plan_Investment_Notice.pdf)

# Vanguard Target Retirement Funds

## Glidepath Strategy

Target-date funds employ glidepaths, which are the planned progression of asset allocation changes (e.g., mix of equity and fixed-income investments) along specific points in time. A fund's glidepath generally shows how its asset allocation shifts from a more aggressive to a more conservative investment approach as the fund moves toward and beyond its target date.

<sup>1</sup> Glidepath data is presented based on the most current prospectus.

## What are Target-Date Funds?

Target-date funds (also commonly referred to as "lifecycle funds," "retirement funds" and "age-based funds") are managed based on the specific retirement year (target date) included in its name and assumes an estimated retirement age of approximately 65. In addition to age or retirement date, investors should consider factors such as their risk tolerance, personal circumstance and complete financial situation before choosing to invest in a target-date fund. These funds are generally designed for investors who expect to invest in a fund until they retire (the target date), and then begin making gradual systematic withdrawals afterward. There is no guarantee that an investment in a target-date fund will provide adequate retirement income, and investors can lose money at any stage of investment.

## Vanguard Target Retirement Funds

Target Date

AS OF 9/30/2025

## Investment Objective and Strategy

The investments seek to provide capital appreciation and current income consistent with their current asset allocation. The funds invest in other Vanguard mutual funds according to an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of the target year. At any given time, their asset allocation may be affected by a variety of factors, such as whether the underlying funds are accepting additional investments. The funds' indirect stock holdings are a diversified mix of U.S. and foreign large-, mid- and small-capitalization stocks.

## Morningstar Rating

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

## Performance

The returns quoted represent past performance, which is no guarantee of future results. Returns and the principal value of your investment will fluctuate. Current performance may be higher or lower than that shown, and you may have a gain or a loss when you redeem your mutual fund shares. For current performance information, including performance to the most recent month-end, call 800-842-2888. Performance may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursement arrangements, performance may be lower.

You should not view or construe the availability of this information as a suggestion that you take or refrain from taking a particular course of action, as the advice of an impartial fiduciary, as an offer to sell or a solicitation to buy or hold any securities, as a recommendation of any securities transactions or investment strategy involving securities (including account recommendations), a recommendation to rollover or transfer assets to TIAA or a recommendation to purchase an insurance product. In making this information available to you, TIAA assumes that you are capable of evaluating the information and exercising independent judgment. As such, you should consider your other assets, income and investments and you should not rely on the information as the primary basis for making investment or insurance product purchase or contribution decisions. The information that you may derive from this material is for illustrative purposes only and is not individualized or based on your particular needs. This material does not take into account your specific objectives or circumstances, or suggest any specific course of action. Investment, insurance product purchase or contribution decisions should be made based on your own objectives and circumstances. The purpose of this material is not to predict future returns, but to be used as education only. Contact your tax advisor regarding the tax implications. You should read all associated disclosures.

Mutual funds are offered through your plan sponsor's retirement plan, which is recordkept by TIAA. Funds are offered at that day's net asset value (NAV), and the performance is displayed accordingly. Performance at NAV does not reflect sales charges, which are waived through your retirement plan. If included, the sales charges would have reduced the performance quoted.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Neither TIAA nor its affiliates has independently verified the accuracy or completeness of this information.

The Morningstar Category classifies a fund based on its investment style as measured by underlying portfolio holdings (portfolio statistics and compositions over the past three years). If the fund is new and has no portfolio, Morningstar estimates where it will fall before assigning a more permanent category. When necessary, Morningstar may change a category assignment based on current information.

The Morningstar Rating™ – or “star rating” – is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The rating is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Where applicable, ratings are based on linked performance that considers the differences in expense ratios. The Morningstar Rating™ is for individual share classes only. Other classes may have different performance characteristics.

### A Note About Risks

Target-date mutual funds share the risks associated with the types of securities held by each of the underlying funds in which they invest. **As with all mutual funds, the principal value isn't guaranteed. Also, please note that the target date is an approximate date when investors may begin withdrawing from the fund. Target-date mutual funds are actively managed, so their asset allocations are subject to change and may vary from those shown. After the target date has been reached, some of these funds may be merged into a fund with a more stable asset allocation.** An investment in a target-date mutual fund is subject to various types of investment risk, which may include but is not limited to:

**Active Management Risk**, the risk that a fund may underperform because of the allocation decisions or individual security selections of its portfolio manager; **Asset Allocation Risk**, the risk that the selection of investments and the allocation among them will result in the fund's underperformance versus similar funds or will cause an investor to lose money; **Call Risk**, the risk that, during periods of declining interest rates, an issuer of a bond may "call" (i.e., redeem) a bond prior to maturity, and the associated risk that bondholders will be reinvesting the proceeds at a lower interest rate; **Company Risk**, the risk that the financial condition of a company may deteriorate, causing a decline in the value of the securities it issues; **Credit Risk**, the risk that an issuer of bonds may default; **Current Income Risk**, the risk that the income a fund receives may unexpectedly fall as a result of a decline in interest rates; **Emerging Markets Risk**, the risk that securities issued in developing markets, where there is greater potential for political, currency and economic volatility, may be less liquid than those issued in more developed countries and foreign investors in these markets may be subject to special restrictions which could have an adverse impact on performance; **Extension Risk**, the risk that a security's duration will lengthen, due to a decrease in prepayments caused by rising interest rates; **Foreign Investment Risk**, the risk that securities of foreign issuers may lose value because of erratic market conditions, economic and political instability or fluctuations in currency exchange rates, which may be magnified in emerging markets; **Growth Investing Risk**, the risk that, due to their relatively high valuations which are generally a function of expected earnings growth, growth stocks will be more volatile than value stocks and such earnings growth may not occur or be sustained; **Income Volatility Risk**, the risk that the income from a portfolio of securities may decline in certain interest rate environments; **Index Risk**, the risk that a fund's performance may not match that of its benchmark index; **Interest Rate Risk**, the risk that interest payments of debt securities may become less competitive during periods of rising interest rates and declining bond prices; **Large-Cap Risk**, the risk that large companies may grow more slowly than the overall market; **Liquidity Risk**, the risk that illiquid securities may be difficult to sell at their fair market value; **Market Risk**, the risk that the price of securities may fall in response to economic conditions; **Mid-Cap Risk**, the risk that stocks of mid-capitalization companies may have greater price volatility, lower trading volume and less liquidity than the stocks of larger, more established companies; **Prepayment Risk**, the risk associated with the early unscheduled return of principal on fixed-income investments, such as mortgage-backed securities; **Risks of inflation-indexed bonds**, the risks that interest payments on inflation-indexed bonds may decline because of a change in inflation (or deflation) expectations; **Small-Cap Risk**, the risk that the securities of small companies may be more volatile than those of larger ones, and they are also often less liquid than those of larger companies because there is a limited market for small-cap securities; **Style Risk**, the risk that a fund's investing style may lose favor in the marketplace.

In addition, target-date mutual funds are subject to the risk that they may be unable to invest according to their target allocations due to changes in the value of their underlying investments. For a detailed discussion of risk, please consult the prospectus.
