WINTERIZE YOUR WORK-FROM-HOME PLAN

Without fail, every winter brings a few snow days—those bad-weather occasions when schools and child care facilities are closed and employees are asked to stay off the roads (even though the campus remains open). In addition to digging out your gloves and ice scraper, you’ll want to get comfortable with a range of collaborative tools you can use to telework in a pinch—easily and efficiently.

You can collaborate with colleagues (wherever they might be) without missing a beat by using Zoom, an easy-to-use video conferencing tool that offers a seamless experience across mobile devices, desktops, and conference rooms, along with Skype for Business, Outlook Calendar sharing, and Webex. Harvard also recently rolled out Microsoft Teams, which combines video conferencing, document sharing, and online chats.

Need files? No problem. With HUIT’s OneDrive, you can access your work files on your home computer. Want to get up to speed on some of these collaborative tools? Consider taking part in an upcoming Teams (HarvardKey required) or OneDrive (HarvardKey required) workshop.
